Art Unit: 1653

Claims 1-9 have been canceled New Claims 10 and 11 are currently pending and are subject to restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 10, drawn to a zinc finger nucleotide binding polypeptide comprising 2 to 6 nucleotide binding regions selected from SEQ ID NOs: 17-110, classified in class 530, subclass 300.
- II. Claim 11, drawn to a composition comprising 2 to 12 nucleotide binding regions selected from SEQ ID NOs: 17-110, classified in class 514, subclass 12.

The inventions are distinct, each from the other because of the following reasons:

SEQ ID NOs: 17-110 differ in structure and in function. Therefore, these sequences are considered to be patentably distinct. Claims 10 and 11 have been separated because the polypeptide comprises 2 to 6 nucleotide binding regions selected from SEQ ID NOs: 17-110 within a single polypeptide sequence, while Claim 11 is drawn to a composition of individual peptides selected from SEQ ID NOs: 17-110.

If Applicants elect Group I, Claim 10, Applicants must also elect 2 to 6 sequences selected from SEQ ID NOs: 17-110. It will be understood that any of the SEQ ID NOs: 17-110 elected by Applicants will be found within the same polypeptide sequence.

If Applicants elect Group II, Claim 11, Applicants must also elect 2 to 12 sequences selected from SEQ ID NOs: 17-110. It will be understood that any of the SEQ ID NOs: 17-110 elected by Applicants will be found as individual, unconnected, peptides within the same composition.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1653

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
